Perfect Fitness Tracker for Cat
LavvieTAG Pro

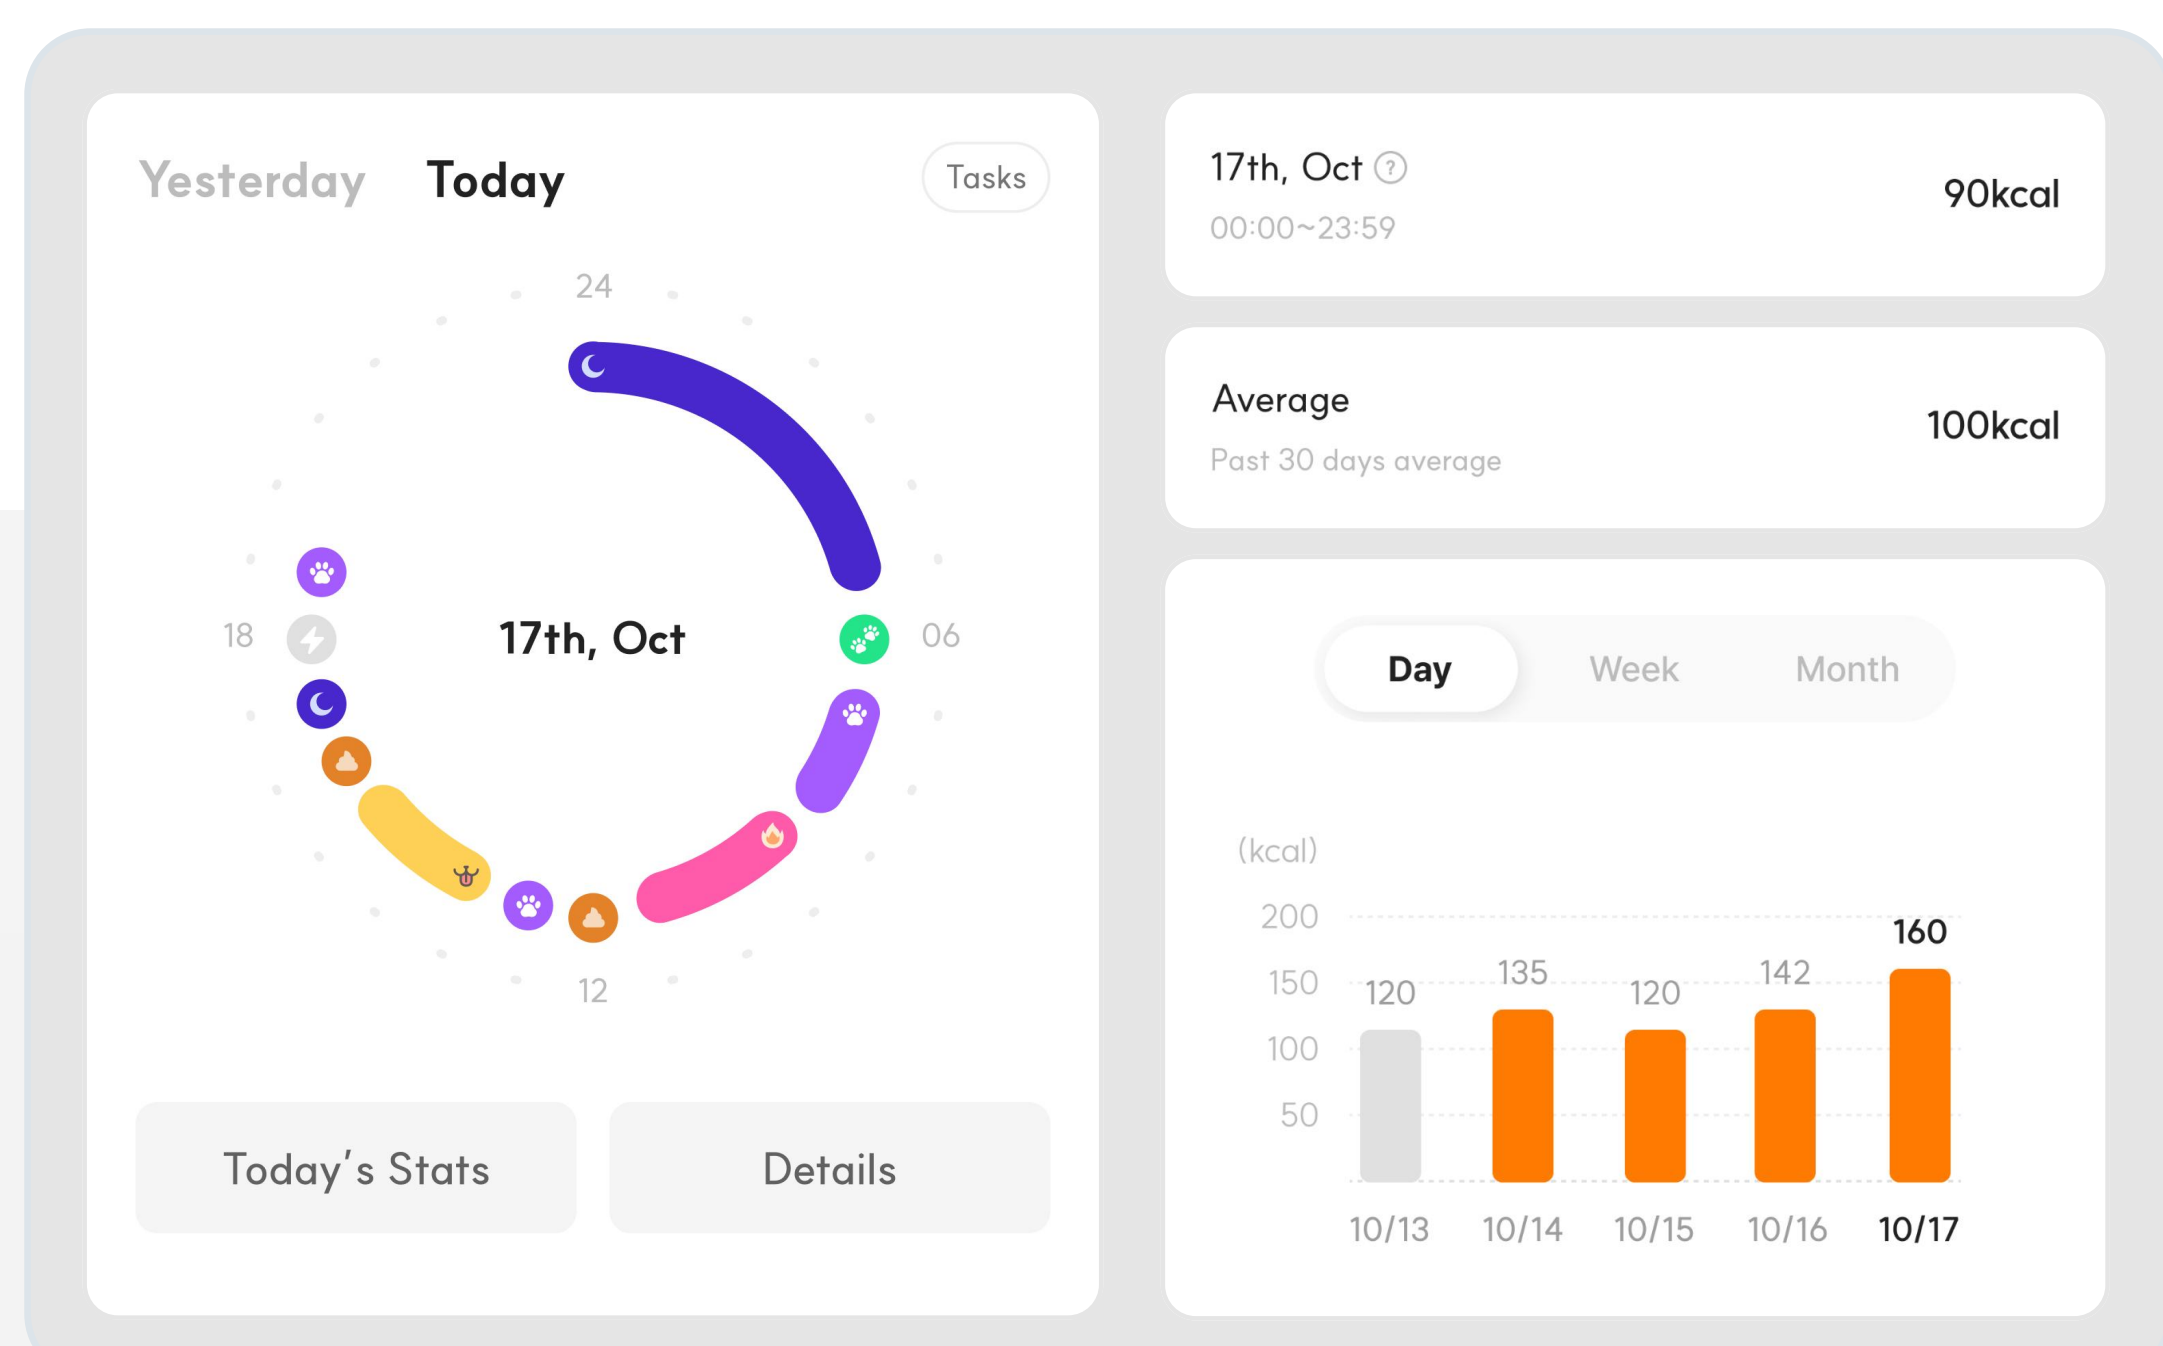

LavvieTAG Pro

BLE Based Location Tracking Technology:

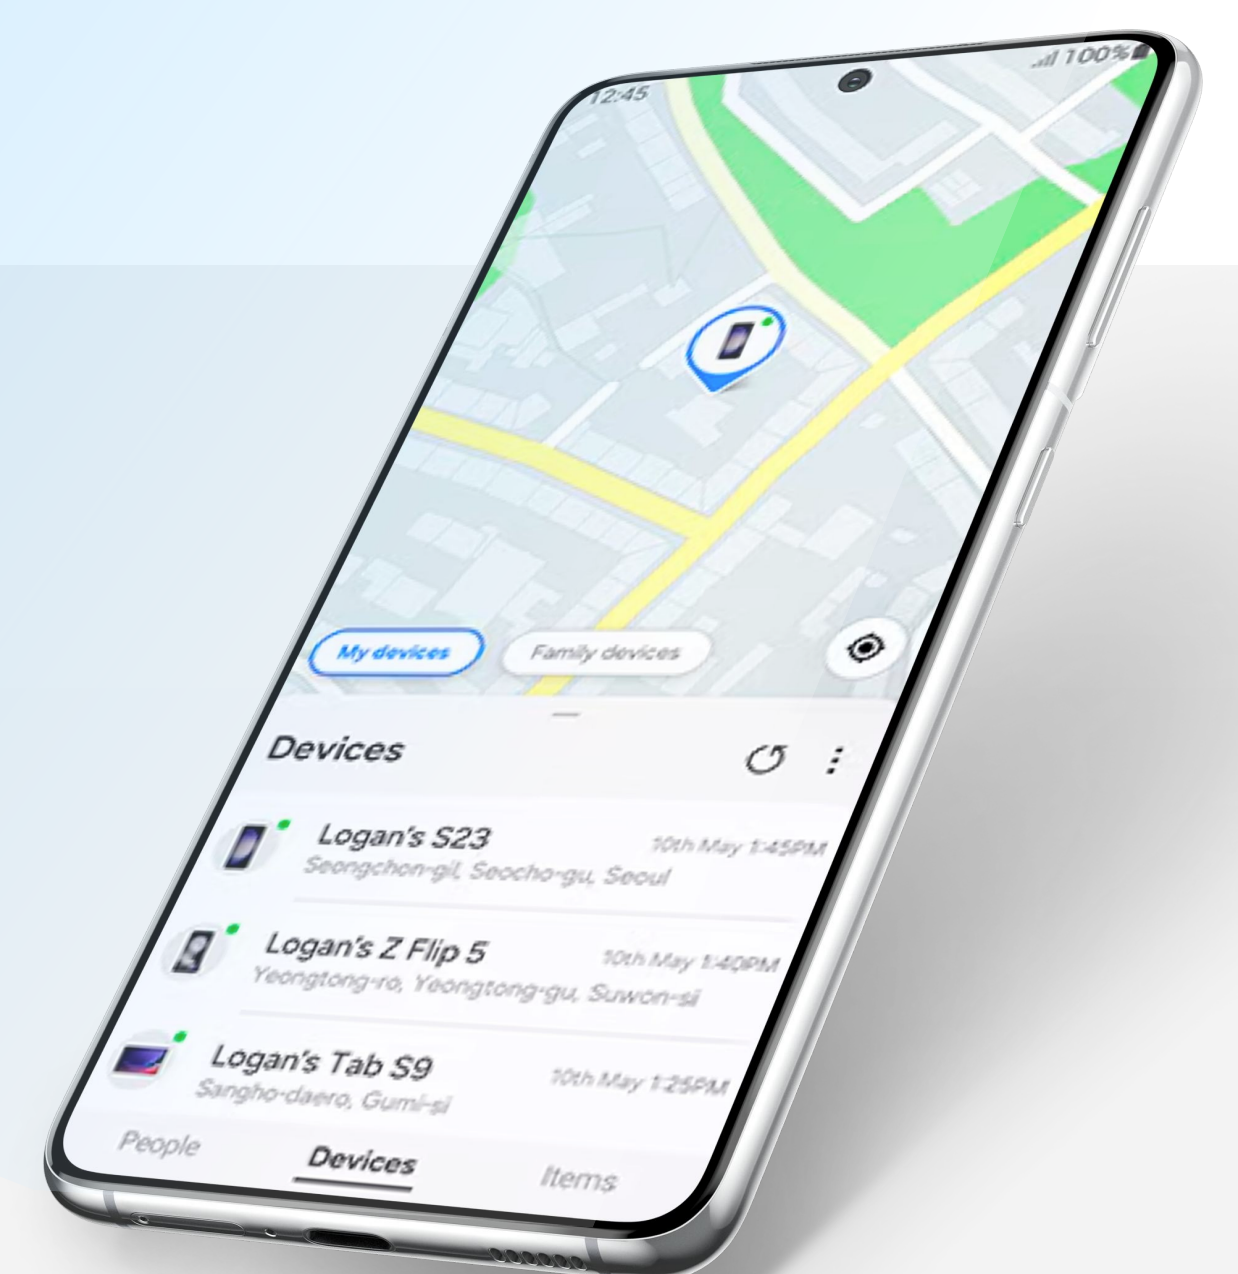

Due to its lower power consumption compared to GPS-based location tracking, this technology extends usage time by up to 4 months.

With Bluetooth, LavvieTAG Pro has evolved into an all-in-one healthcare tracker for cats.

1 Object Recognition Technology

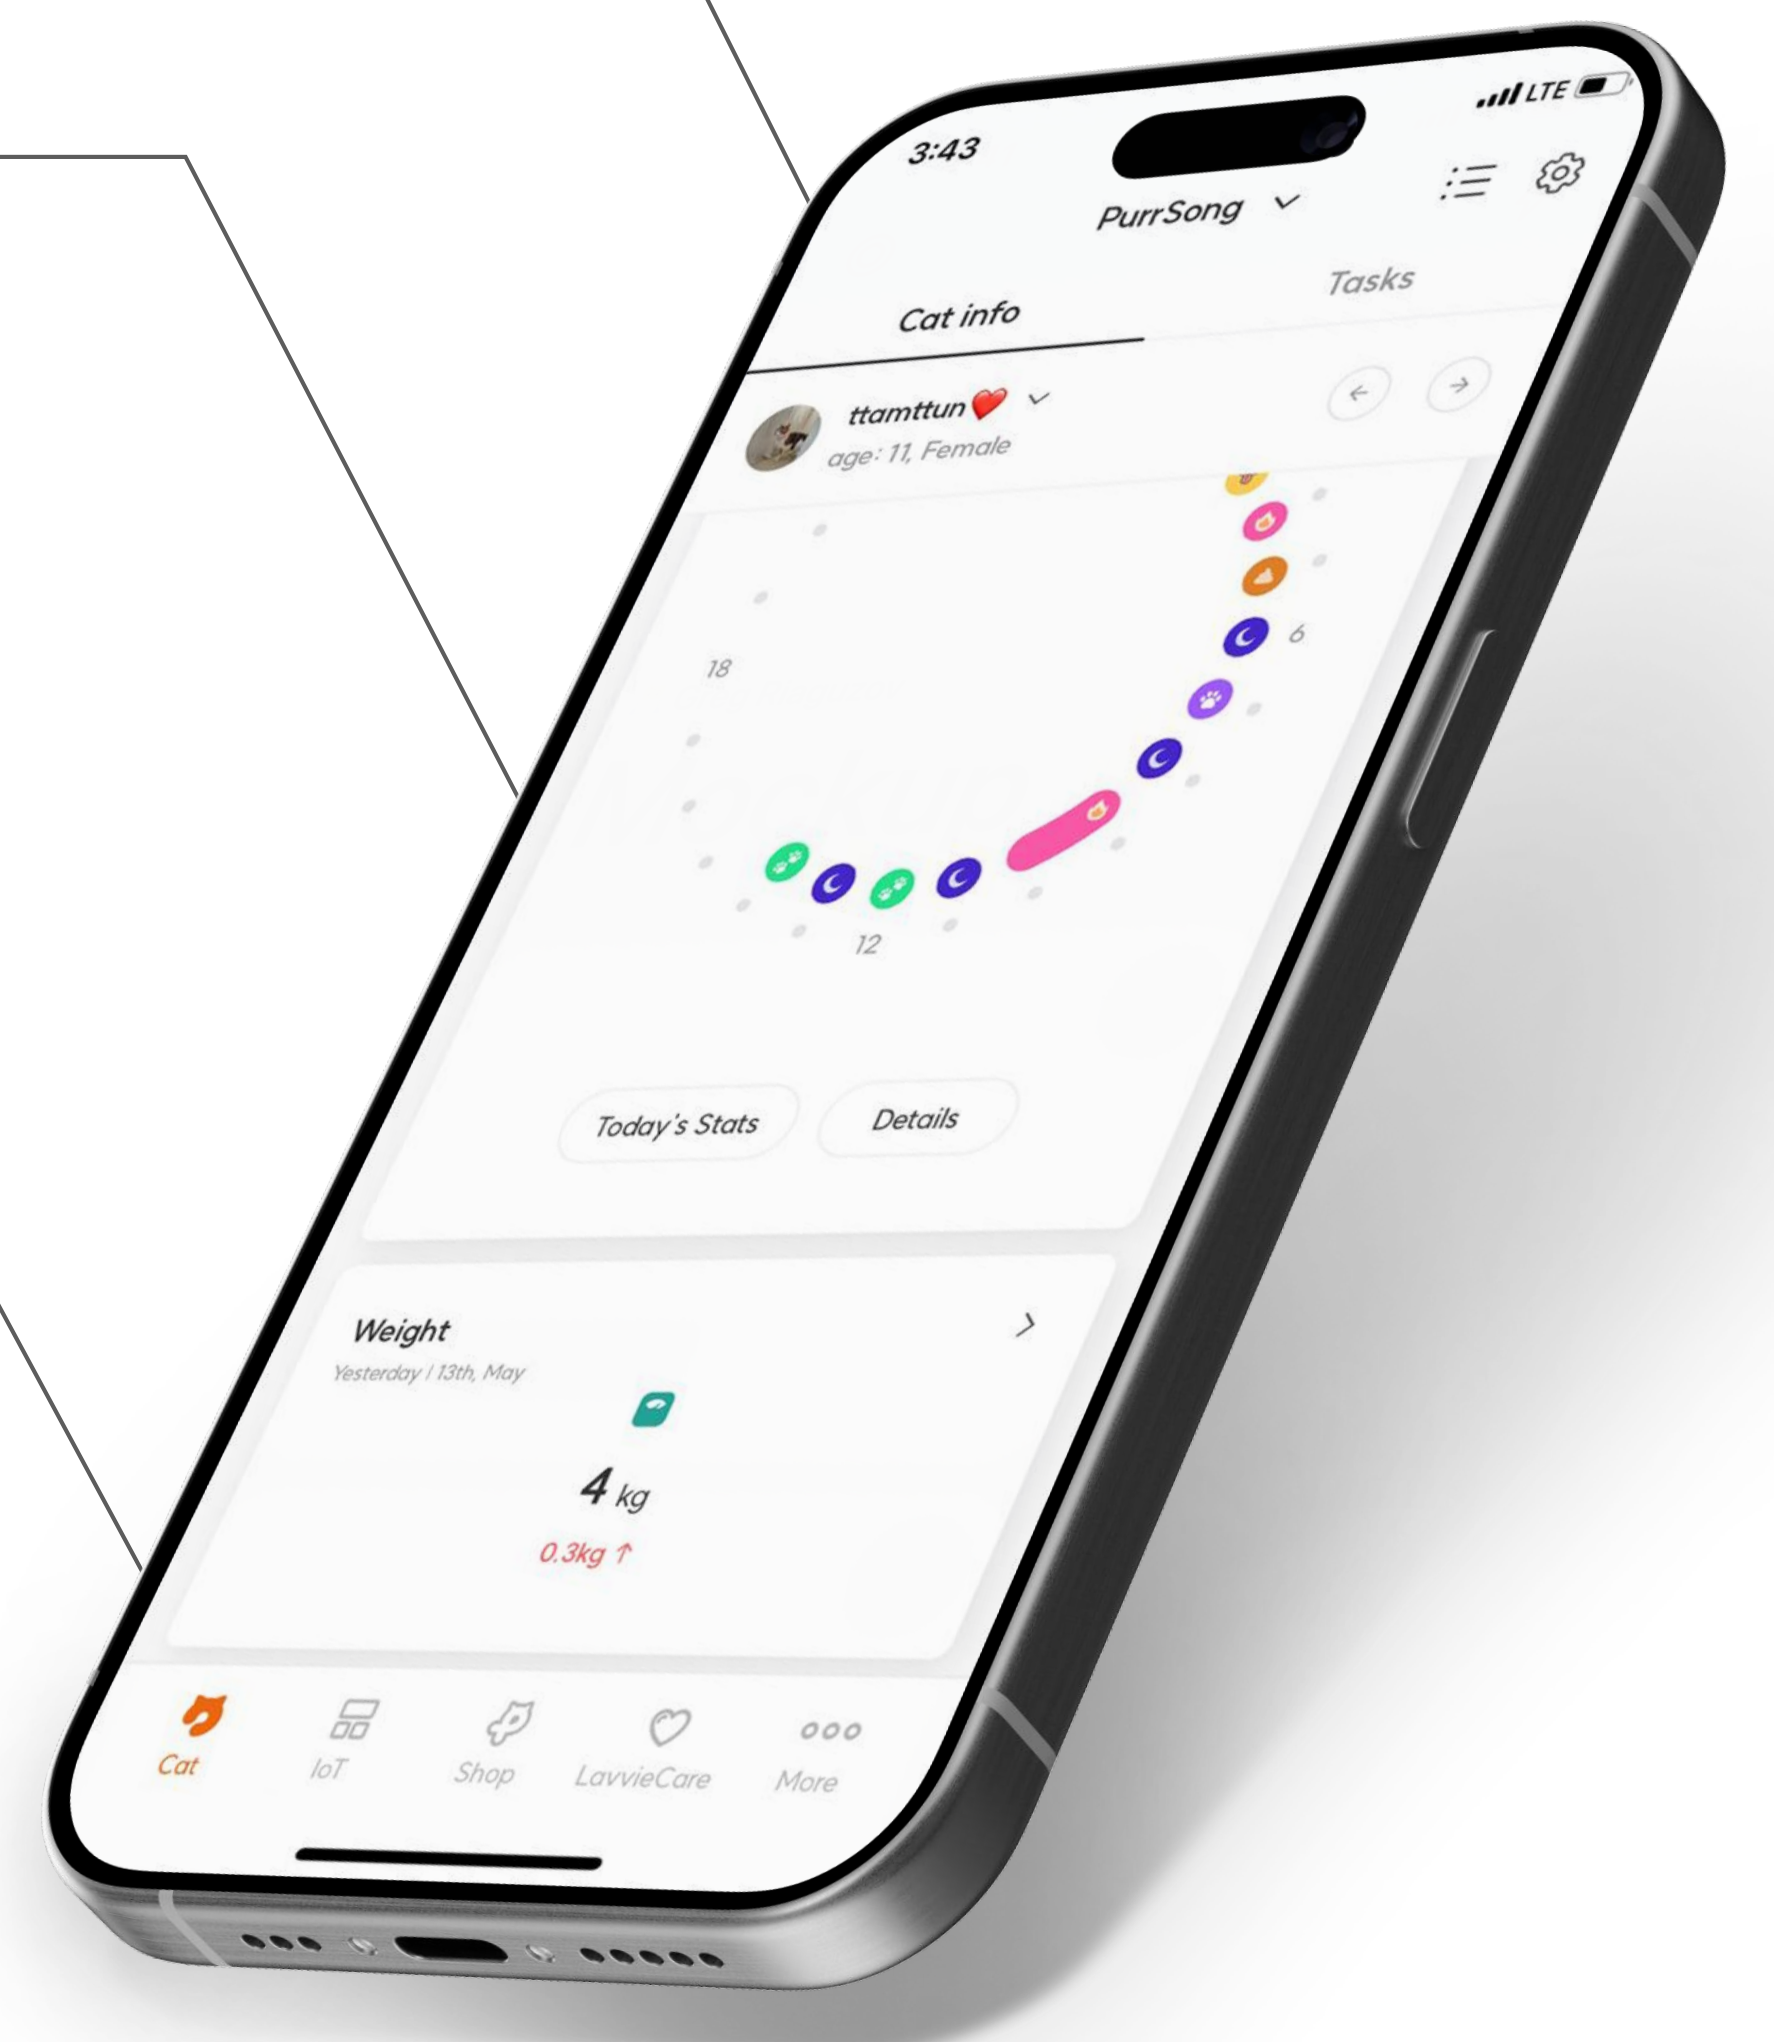

Utilizing BLE RSSI strength, this technology communicated with water dispensers and feeders to accurately identify between each of the different pets.

2 Behavior Analysis Technology

By optimizing the analysis firmware for lower power consumption, the behavior analysis algorithm with 93% accuracy has been developed. This allows users to track how much time their pets spend on various activities each day, such as grooming, drinking, sleeping, running, walking and resting.

3 Anomaly Detection Technology

Leveraging a machine learning algorithm trained on data from 10,000 pets in partnership with veterinary hospitals, this technology detects and classifies health abnormalities in cats with 95% accuracy and predicts potential diseases.
